Kingspan Offices, Christchurch

After we outgrew our existing offices we chose to build a new office and showcase how Kingspan Insulated panels could be used on smaller office, warehouse type developments.

The main office is clad in two different Architectural panels to showcase a number of profiles. The windows are an integrated window system (available from APL) which allow for clean lines and a fast installation.

The low pitch roof is exposed within the office area which gives a feeling of space.

The warehouse is clad in our trapezoidal panel which provide clean lines with minimal structure.

Kingspan reserve the right to amend product specifications without prior notice. The information, technical details and fixings advice are given in good faith but are intended as a guide only. For further information please contact Kingspan Insulated Panels
