Case Study

FIREsafe™ **FIBREfree** **ECOsafe** **AQUAsafe**

Murchison Sports & Recreation Centre, Murchison

Kingspan worked with Arrow International to come up with a roofing and cladding solution for the Murchison Sports Centre.

Kingspan roofing and wall cladding was direct fixed to a simple portal frame, the trapezoidal roofing was installed in less than 2 days an important consideration in a high rainfall area.

To achieve this Nelson Marlborough Roofing made use of a CladBoy suction machine which enables each panel to be craned into place, this eliminates any heavy lifting.

The wall panels were Kingspan Coldstore panel (Micro rib profile) installed horizontally.

The result a simple functional building to meet the community needs.

Kingspan reserve the right to amend product specifications without prior notice. The information, technical details and fixings advice are given in good faith but are intended as a guide only. For further information please contact Kingspan Insulated Panels
